Net Asset Value of HUF series:	4,248,359,178 HUF
Net Asset Value per unit:	2.291006 HUF

## INVESTMENT POLICY OF THE FUND:

The fund aims to create an explicitly defensive investment portfolio for its investors, and typically invests in developed-market government bonds, and related exchange-traded derivative transactions, in the interest of achieving the highest possible return with the assumption of currency risk. The fund primarily aims for a portfolio consisting of the publicly issued bonds of foreign governments and foreign-domiciled companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, when purchasing international securities the fund only selects publicly issued securities that are listed on foreign stock exchanges. The proportion of non-investment-grade securities is maintained at a low level, and if the planned ratio is overstepped due to the downgrading of a given issuer the fund restores it under the conditions stipulated by the relevant legal provisions. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. In the course of its operation, however, the fund is managed on the premise that when compiling the portfolio, it is bonds that determine the nature of the fund. Accordingly, the proportion of bonds that may be kept in the fund at any given moment may reach the prevailing statutory maximum. When compiling the bond portfolio, taking into account the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. To ensure liquidity, the fund may purchase Hungarian government securities (primarily discount treasury bills) and MNB bonds; however, in accordance with the current statutory regulations the proportion of foreign bonds in the portfolio may be up to 100%. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory conditions.

## MARKET SUMMARY:

Last month, new corona virus cases rose further across Europe and the US, with several countries announcing new restrictions, notably France and Germany as well as several CEE countries. GDP in the US and the Eurozone rose by record 7.4% QoQ (non-annualized) and 12.7% in Q3 '20, respectively, although the outlook has deteriorated. The ECB left its monetary policy unchanged, but Christine Lagarde sent a clear message that further stimulus is going to be announced in December. US stimulus talks between House Speaker and Treasury Secretary failed to bring a pre-election agreement. The Eurozone's manufacturing PMI increased to its highest level in more than two years, while the services PMI declined further in contraction territory. EU leaders concluded that progress on UK-EU trade negotiations was not sufficient, while UK Prime Minister said it is no-deal unless there is "fundamental change" from the EU. Spooked by stricter containment measures and some disappointing earnings outlooks in the tech sector, major equity indices plunged by 5-10% at the end of the month, earlier in the month traded mostly on the soft side, with major indices losing up to 2%. Government bonds came under pressure too. The USD strengthened, EURUSD slipped below 1.17 and the TRY accelerated its slide. We bought some more medium- and long-term U.S. government papers as well as UK government bonds and at the same time opened positions in the 10YR Italian government bonds.

## ASSET ALLOCATION OF THE FUND ON 10/31/2020

Asset type	Weight
Government bonds	73.89 %
T-bills	15.48 %
Current account	16.68 %
