Net Asset Value of HUF series:	3,406,327,014 HUF
Net Asset Value per unit:	1.793398 HUF

## INVESTMENT POLICY OF THE FUND:

The fund aims to profit from the return on global equity market investments, through share price gains and dividend income. The bulk of its portfolio is made up of the publicly listed shares of foreign companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign securities that are listed on foreign stock exchanges, and secondarily, it may also invest in shares issued by Hungarian companies. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. However, the fund is managed on the premise that when compiling the portfolio, it is shares that determine the nature of the fund. Accordingly, the proportion of shares that may be kept in the fund at any given moment may reach the prevailing statutory maximum. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory requirements. When compiling the share portfolio, taking into consideration the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

## MARKET SUMMARY:

The corona virus continued to spread uncontrollably in October, reaching even the top of the political leadership. As it turned out, U.S. President Donald Trump and his immediate family were also infected with the virus. New cases are already higher than they were in the spring, and the mortality rate is also rising proportionally. It seems that "virus fatigue" is starting to take hold in the population and austerity is no longer taken as seriously as it was in the spring. The result may be that certain sectors of the economy will have to be shut down again. The only solution would be to produce the vaccine as soon as possible, but even in a best case scenario, this is not expected until next spring. U.S. economic data improved in October. The September ISM non-manufacturing index was better than expected, projecting an improvement in service sector, despite the still raging pandemic situation. Further improvement of the economy depends on whether the next economic rescue package is approved by U.S. lawmakers. Europe is suffering from wave 2 of the epidemic the same way as the U.S. In Germany, the hospitality and entertainment industry will be closed down in November, while in France, due to the much faster-than-expected spread of the epidemic, French President Macron has decided to certain closures in the economy, but unlike in the spring left the schools open. The Chinese economy grew 4.9 percent year-over-year in the third quarter, massively outperforming other regions, although analysts expected more, at 5.2 percent. Industrial production in September grew by 6.9 percent and retail sales by 3.3 percent in September from a year earlier, they were both higher than expected. The PMI value of the Caixin / Markit service sector in September came in strong at 54.8, showing economic expansion. For now, it seems that the Chinese economy has already overcome the economic difficulties caused by the virus and started to grow again. The corona virus is also spreading uncontrollably in Hungary. Nothing has been utilized from the previously announced economic stimulus package, and the forint shows very well the vulnerability of the economy. Although the domestic currency has not weakened against regional currencies, it is very close to the March low against the euro. The fund achieved a slight negative return in October, and performed same as the benchmark. Emerging markets underperformed emerging markets in October, while within advanced markets, measured in HUF, Japan had the best performance, followed by America, and European equities suffered the biggest decline. The equity weight is neutral in the fund, we want to wait for the result of the US election before establishing larger positions. By the end of the month, we covered part of the benchmark index with index futures contracts instead of individual positions. The fund continues to pursue a growth strategy.

## ASSET ALLOCATION OF THE FUND ON 10/31/2020

Asset type	Weight
Collective securities	76.07 %
