Net Asset Value of institutional series:	316,357 PLN
Net Asset Value per unit:	1.118148 PLN

INVESTMENT POLICY OF THE FUND:

The aim of the fund is to function as a stable, low-risk investment vehicle, but to offer investors better returns than the performance of the current benchmark index. The fund is a standard variable net asset value money market fund. The portfolio elements are selected in accordance with these and the Money Market Funds' principles. The portfolio elements are selected in accordance with the above mentioned principles and based on the EU wide regulation on money market funds. To ensure liquidity the fund manager primarily aims to hold government bonds and discount treasury bills issued by the Polish Debt Management Agency, and short-term instruments (e.g. deposits, repos) available on the interbank market. The fund is allowed to invest in securities issued or guaranteed by any EU member state, and in money market instruments issued or guaranteed by a supranational institution established in the EU in accordance with the Money Market Funds Regulation. The fund is only allowed to invest in debt securities, which are classified as investment grade on average by the external credit rating agencies. In addition, some financial assets, which are particularly addressed by the EU wide money market regulation, shall have a favourable assessment based on the internal credit quality assessment procedure. The fund may also hold investment units or shares within the framework of the Money Market Funds Regulation. The Fund invests at least 50% of its assets in PLN denominated assets (money market instruments issued or guaranteed by the Polish state; deposits; cash), also fulfilling the diversification requirements of the Money Market Funds Regulation. The Fund shall have a weighted average maturity no more than 6 months, and a weighted average life no more than 12 months. Moreover, the Fund shall also be allowed to invest in money market instruments with a residual maturity until the legal redemption date of less than or equal to 2 years, provided that the time remaining until the next interest rate reset date is less than or equal to 397 days. The fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk (the difference between the currency risk exposure of the derivative instrument and the hedged instrument can be maximum 5%). Aegon Polish Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in Aegon Polish Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in Aegon Polish Moneymarket Fund is capable of fluctuation. Aegon Polish Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

MARKET SUMMARY:

In November, we witnessed some rising yields in the Polish bond market. Yields were 3 basis points higher at three-year maturities and 4-5 basis points higher at 5- and 10-year maturities than at the beginning of the month. Moving on to economic data, the Polish economy is expected to face a recession this year. According to the expectations in November the GDP will contract by 3.5% in 2020 and will grow by 4% in 2021. Better-than-expected macro data would justify higher yields, but they are offset by the global liquidity and QE programs. In the third quarter, GDP contracted by 1.5% year-on-year, exceeding market expectations, while it grew by 7.9% quarter on quarter. In the third quarter, economic growth was driven by the retail sector and manufacturing, but the export growth also made a positive contribution to GDP. Fourth-quarter GDP growth was revised downwards from -3.8% to -4.4% due to the second-wave constraints. According to preliminary data the year-on-year inflation slowed to 3% in November from 3.1% in October. The central bank's forecasts is that inflation will be 3.4% this year. The Purchasing Managers Index remained unchanged from 50.8 in October. Due to the weakening demand, production fell again. Industrial production grew by 1% in October, outperforming market expectations. As for general budget, the accumulated deficit for the first ten months was PLN 12,070 million, so that in October the government generated a surplus of PLN 1,684.5 million. The budget balance in 2020 is projected to be -9.6% of GDP.
