Total Net Asset Value of the whole Fund:	11,626,505,023 HUF
Net Asset Value of EUR series:	939,751 EUR
Net Asset Value per unit:	1.342285 EUR

## INVESTMENT POLICY OF THE FUND:

The fund aims to profit from the return on global equity market investments, through share price gains and dividend income. The bulk of its portfolio is made up of the publicly listed shares of foreign companies. When building the fund's portfolio, beyond the minimum statutory requirements, the principles of safety and maximum diversification (the spreading of risk) are observed. Accordingly, the fund primarily buys publicly issued foreign securities that are listed on foreign stock exchanges, and secondarily, it may also invest in shares issued by Hungarian companies. The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term. However, the fund is managed on the premise that when compiling the portfolio, it is shares that determine the nature of the fund. Accordingly, the proportion of shares that may be kept in the fund at any given moment may reach the prevailing statutory maximum. The fund management company is permitted, at its own discretion, to hedge all or a part of its currency risks with forward currency positions, in compliance with the statutory requirements. When compiling the share portfolio, taking into consideration the macroeconomic environment of the investment markets, the aim is to build up a long-term investment portfolio primarily on the basis of fundamental analyses. In accordance with the current legislation, the proportion of shares in the portfolio may be up to 100%.

## DISTRIBUTORS

Aegon Magyarország Befektetési Alapkezelő Zrt., Aegon Životná poisťovňa, a.s., CONCORDE Értékpapír Zrt., Raiffeisen Bank Zrt., SC Aegon ASIGURARI DE VIATA SA, Takarékbank Zrt

## MARKET SUMMARY:

In November, we got the answers to two questions that preoccupied investors throughout the year. First, we have finally found out who will be president of the United States in the next four years, and the other, perhaps more importantly, in the current circumstances, is when we can expect to be vaccinated against the corona virus. The U.S. presidential election was won by former President Barack Obama's Vice President Joe Biden. More importantly, in the case of the corona virus, we can finally see the light at the end of the tunnel. In November, three drug companies announced that the Phase 3 trials were extremely successful, and mass vaccinations could begin as early as the first half of December. U.S. stock market indices rose significantly in November on news that the vaccine is about to be distributed in the near future. The Russell 2000 index was able to break through the 2018 level and hit a new all-time high, and the Dow Jones index broke the psychologically important 30,000 mark for the first time in its history. Stock markets are extremely optimistic about the future and seem to price in the best case scenario. It is true that starting to vaccinate the population next spring will be of great help to the economy, but stock markets are currently pricing that by next summer, everything will be back to pre-Covid-19. At least that what share prices and market expectations reflect. The European economy is mixed. Although the German consumer sentiment index fell from the previous -3.1 to -6.7 in November, below the expected -4.9, the euro area manufacturing PMI remained at 48.8 in October, compared with the previous month value of 53.7. This is the fourth month that the indicator is above 50, which indicates the expansion of the economy. New orders rose from 57 to 58.7, the highest reading since January 2018. The economies of China and other Asian countries may be already thru the pandemic, at least macroeconomic data suggest so. The Caixin's manufacturing PMI was 53.6, slightly higher than what it was expected, indicating expansion in the economy. China's manufacturing PMI was better than expected, reaching 52.1 instead of the expected 51.5 in November. The corona virus continues to spread uncontrollably in Hungary. Nothing has been implemented from the previously announced economic stimulus package, and the Hungarian forint shows the vulnerability of the economy as well. Although the domestic currency has not weakened against regional currencies, it cannot gain significant ground against the euro. The fund achieved a positive return in November and also outperformed its benchmark. The developed markets outperformed emerging markets in November. Measured in HUF, Europe had the best performance in developed markets, followed by Japan and the U.S. After the presidential election uncertainty, the value-based and the small market-cap sectors outperformed significantly in November due to the vaccine news. In response to vaccine news, we slightly reduced the fund's exposure in the growth sector.

## ASSET ALLOCATION OF THE FUND ON 11/30/2020
