ISIN code:	HU0000716055
Start:	03/17/2016
Currency:	CZK
Total Net Asset Value of the whole Fund:	21,768,849,797 HUF
Net Asset Value of CZK series:	CZK
Net Asset Value per unit:	1.070491 CZK

INVESTMENT POLICY OF THE FUND:

The objective of the Fund is to provide capital return for the investors within the appropriate risk limits. The aim of the Fund is to achieve the highest possible return for a given risk level by buying undervalued stocks and fixed income assets and selling overvalued instruments. The Fund is allowed to buy shares, bonds and other instruments, to open short positions on the spot market, to take long and short forward and future positions. Moreover, the Fund can trade on the option market. The portfolio of the Fund is separated into three classes according to their investment objective: Instruments of the first class consist of long positions of long term, fundamentally undervalued, and short positions of overvalued equities. The method of stock picking is identical with the applied methods of Aegon equity related funds and mainly concentrate to the CEE regional markets, although the Fund is allowed to invest in other emerging and developed market instruments. The second class of the Fund's instruments implement the top-down equity strategy of Aegon Asset Management Co., mainly with long and short positions on the futures markets. These positions are based on the scores of the so-called "quadrant model", which is the internal asset allocation model of the Asset Management Company. Instruments of the third class involve the fixed income part of the Fund. The aim of the third class is to reach or exceed the performance of the RMAX Index. The target weight of the first and second classes altogether is 45%.

MARKET SUMMARY:

In April, systematic vaccination against Covid-19 continued in the developed world. Vaccine companies have started to ramp up vaccine production, so it is probably safe to say that by the end of May or early June, those in the developed world who ask for the vaccine will get it. The most spectacular progress has been made in the United States, where more than 35% of the population has already been vaccinated, and since mid-April there have been no restrictions on vaccination, so anyone of any age can get the vaccine. In Europe, vaccine availability varies by country. In Hungary, everyone who has applied can now get the vaccine, while in Germany the same is expected by the end of June. If the vaccination schedule continues at this rate, there is a chance for the developed world to see a "normal" summer season unfold. The the major indices hit new all-time highs, thanks to the lower US yields. At the moment there is a so-called "goldie lock" scenario, which means that interest rates are higher than before but not high enough to hurt stock markets and at the same time the economy is growing. Economic forecasts remain positive and although there is already a noticeable inflation in the economy, but not high enough to cause serious damage to companies. There is finally some good news about the corona virus in Hungary. Although the mortality rate is still very high, one of the worst in the world on a population basis, but the vaccination rate is one of the best. The government has ordered a reduction in restrictions, and restaurants have been allowed to open, albeit with some restrictions. This positive change is reflected in the forint exchange rate. It moved in a relatively narrow range, closing the month near the 360 level. The fund achieved a positive return in April. Greek banks, commodity-linked copper mines and the Taiwanese exposure contributed most to the fund's return. What hurt the fund was exposure to the oil- growth- and solar sectors. We will continue to focus on the reflation theme and therefore we intend to keep or increase the weight of the energy- commodity- and the bank sectors in the fund. Bond exposure also contributed negatively to the fund's exposure in April, mainly due to the rise in US yields. By the end of the month, the fund had a 50% equity weight.

ASSET ALLOCATION OF THE FUND ON 04/30/2021
