

MARKET SUMMARY

Now that people are slowly but surely getting back to their pre-Covid way of life, May was finally about when and how economies can re-open. This varied from country to country, depending on the vaccination rates. In Europe, it was England that led the vaccination rate, but fortunately for us, Hungary was also in the top 5 in the world. The question now is how the emergence of the new Indian mutant in Europe will change the re-opening plan. If we are lucky, the Indian version will be more contagious than the typical strain but not as deadly as the English variant was. There also remains the question of whether existing vaccines are effective against the Indian version or whether new vaccines need to be developed. Although the stock markets continued to rally in May, volatility was higher than in April. Investors also felt that stock market averages did not reflect the performance of the real economies, but as long as central banks provide the markets with the current amount of liquidity, there is little chance of any major correction. Investors will therefore be easily jittered if any announcement from central banks suggests that money supply may be tightening. Additionally, there was finally some good news about the corona virus in Hungary. Both the number of cases and the death toll went down in May. This was mainly due to the fact that Hungary had one of the best vaccination rates in the world. The economy was also picking up but at a price. Accumulated demand flooded into the market all at once, which was reflected in higher prices and the inflation forecasts. In May, inflation was over 5% on a year-on-year basis, which got the National Bank's interest. The bank believes that this is a temporary rise, but if it is not, they are prepared to raise interest rates. On hearing this news, the forint strengthened to below 350 against the euro.

The fund achieved a positive return in May after all the fund's investments managed to post positive returns. All funds contributed between 1-1.7% to the performance.

INVESTMENT POLICY OF THE FUND

The aim of the fund is to create for its investors an investment portfolio that generates a positive yield under all circumstances; in other words, it takes a 'total return' approach. It does this by using various analysis techniques to select the asset classes and investment funds that have the greatest potential to appreciate in value, and by investing in the shares of investment funds and in collective investment securities.

The fund primarily invests its capital in the funds managed by Aegon Hungary Investment Fund Management, but it may also purchase other investment funds and collective investment securities for its portfolio for the purpose of diversification, if the given asset class is not yet covered by the fund management company's own funds.

Indirectly, the fund is capable of accessing the entire known investment universe of today through the purchase of investment fund shares (in bond markets, money markets, equity markets, property market, private equity, derivatives and other regulated and OTC derivative products, commodity-market products, currencies etc.), and of making its investments both at domestic and international level.

To ensure liquidity, the fund may hold discount treasury bills and government bonds issued by the State Debt Management Centre (ÁKK), interest-bearing securities guaranteed by the State of Hungary, and bonds issued by the National Bank of Hungary.

In order to achieve a positive yield, the fund makes active use of risk management procedures and carefully selects the position size of its riskier investments.

Since the range of investments includes foreign currency-denominated investments, ETFs and investment fund shares, investors in the fund are also exposed to currency risk.

In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in other words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%, except AEGON Money Market Fund, AEGON Domestic Bond Fund, AEGON MoneyMaxx Express Fund, AEGON Alfa Derivative Fund, AEGON Central European Credit Fund and AEGON Ózon Capital Protected Fund.
