

## INVESTMENT POLICY OF THE FUND

The fund's investment objective is to provide investors with a higher return than that attainable in the domestic money market, primarily by investing in the bond market of the Central and Eastern European region. The fund's bond investments are mainly concentrated in the corporate and mortgage bond markets, but government securities issued in foreign currency are also potential investment targets. Forint-denominated Hungarian government securities are only held for liquidity management purposes. The fund may also buy into other investment funds that invest in the above markets. The achievement of a higher return than would be attainable in the Hungarian government securities market is made possible by the better diversification, the additional yield from the premiums of the bonds, and, in a favourable market environment, by the price gains resulting from the narrowing of the premiums.

The fund's general risk level and the asset allocation between the three main areas of investment is determined on the basis of a regular market analysis and situational analysis relating to four main aspects (fundamentals, valuation levels, market sentiment, technical factors). The in-depth analysis is also an important factor in the selection of the individual securities by region, sector and interest risk. In the course of selecting the individual securities, a thorough financial analysis is also essential to determine the creditworthiness of the issuer. Risk management and the regular monitoring of the issuers are of key importance to the fund.

When compiling the fund's portfolio we aim to achieve a moderate risk profile, primarily purchasing investment-grade securities. The fund only buys lower-rated instruments in limited proportions.

The fund may only conclude derivative transactions for the purpose of hedging or ensuring an efficient portfolio structure. The fund may also hold unleveraged collective investments linked to derivative indexes. The fund also has the option of taking on a substantial currency exposure, which will ordinarily be fully hedged, although depending on market circumstances the fund may even have an open currency position.

The fund management company, exercising all due care, based on its own judgement and decisions, and while observing the relevant legal provisions and the limitations stipulated in the Fund Documentation, determines the means of utilising the fund's resources, and the weights of the various investments within the portfolio, with a view to ensuring that the fund - in line with our expectations with regard to future risks and returns - achieves its objective in the long term.

## MARKET SUMMARY

In August growth scares came to the fore a bit as investors were assessing the global activity conditions to turn slightly worse from here. Growth sensitive assets bared the brunt of the growth scare, commodities have fallen approximately 6% in USD terms by the middle of the month. Within the commodity complex oil and copper, the two main commodities that correlate best with global growth have fallen the most by 14% and 12% respectively in US dollar terms within this time period. The sentiment turned after Jay Powell, Fed governor gave his speech in Jackson Hole which took the market as rather dovish. The event had lifted markets and financial assets closed the month more or less unchanged. The emerging market bond space was the beneficial of the dovish speech and after Jackson Hole the assetclass was able to gather momentum and close the month in positive. The main outperformer regions in the sovereign credit space in EM were Africa where the most single B issuers are found with high spreads and the Middle East with 16 and 17 basispoints of spread tightening. In EM Europe Ukraine and Turkey managed to rally by 35 basispoints and 22 basispoints respectively.

We increased our duration position and went down the credit rating ladder. We bought some long end Ghana exposure as spread levels are high.

## GENERAL INFORMATION

Fund Manager:	AEGON Hungary Fund Manager Ltd.
Custodian:	Raiffeisen Bank Zrt.
Main distributor:	AEGON Hungary Fund Manager Ltd.
Benchmark composition:	100% RMAX Index + 1%
