

INVESTMENT POLICY OF THE FUND

The objective of the fund is to benefit on the economical growth of emerging countries. The fund accomplishes this goal basically via individual equity investments, however it may also hold collective investment instruments, if it is necessary for the efficient management of the portfolio. These can primarily be ETFs listed on the stock exchange, bank deposit, account money, repo transactions, and open-end public investment funds. In the course of selecting the equities the Fund dedicates special attention to the compliance of individual companies with ESG (environmental, social, governance) criteria, so in addition to analyzing the financial factors, portfolio managers also take into consideration environmental, social and governance factors during the investment decision making process. The goal of the Fund Manager is to establish a portfolio, in which the average of indicators measuring ESG compliance of the individual companies is more favorable than the aggregated indicator of the benchmark index, i.e. their operation is characterized by more advanced environmental, social and governance responsibility.

Environmental criteria include elements in the course of which the company comes into contact with the environment. Besides these, no additional special goals are set by the Fund.

These include for example the energy utilization, waste management, pollutant emission and/or the preservation of natural resources. Social criteria include all relations maintained by the company with its external partners, customers and internal employees. Corporate governance criteria are legal factors impacting reliable operation of a company.

MARKET SUMMARY

In August, markets continued their march to new highs and another record was broken. So far, the number of new highs set in August was 11, which occurred in 1929, followed by 10 in 1987. Both are notable, as these two years saw the two biggest market falls of the 20th century. We don't know if 2021 will be remembered for this, but it is safe to say that the current market overvaluation far exceeds that of 1929 and 1987. The economic structure now is completely different from what it was then. The growth of the economies was not so dependent on the performance of stock markets, which puts the current market conditions in a different perspective. Thanks to the continuous intervention of central banks, stock markets no longer reflect the real valuation of the real economies, but the liquidity provided by central banks. If this flow of money were suddenly stopped, there would be another crash regardless of the performance of the real economies. The US Federal Reserve wants to avoid this at all costs, and will do everything in its power to do so. The Jackson Hole meeting in August was held in this spirit, when Fed President Jay Powell implicitly suggested that the money supply would not be turned off. Although he hinted that not everything is going the way the Fed would like, he said that the time for financial tightening had not yet come. In Hungary the central bank has raised the interest rate by another 30 basis points to 150 basis points. The central bank's clear aim is to keep inflation in check without torpedoing economic growth. At the same time, they also want to stabilize the forint exchange rate, preferably around the EUR/HUF 350 exchange rate. With inflation on the rise around the world, it is possible that the central bank will be forced to raise interest rates further in order to keep Hungarian inflation inline. The fund posted a negative return in August and underperformed the benchmark index. Emerging market performance continued to be affected by the news flow from China. Because of this we took profits in the middle of the month, closing half of the Chinese underweight. Currently, the fund is overweight in Mexico, Russia, Taiwan and the CEE region. Going forward, we intend to selectively buy individual stocks within the underperforming Chinese internet sector to increase our China exposure.

GENERAL INFORMATION

Fund Manager:	AEGON Hungary Fund Manager Ltd.
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	AEGON Hungary Fund Manager Ltd.
Benchmark composition:	100% MSCI EM (EMERGING MARKETS) ESG
