

## INVESTMENT POLICY OF THE FUND

The fund's investment objective is to provide investors with capital appreciation by investing in the sovereign- and quasi-sovereign bond market of Emerging European countries. The fund has no rating constraints, the fund has a permission to invest in any kind of issuer without limitation on its long-term foreign currency debt rating. The fund aims to reach the highest capital gain with rational risk taking. The fund primarily invests on the sovereign- and quasi-sovereign bond market of Emerging European countries denominated in foreign currency, but holds Hungarian local currency, long- and short-term bonds with diversification and liquidity management purposes. The fund may also invest in mortgage backed securities, and short- and long-term, fixed or floating securities of other financial institutions, municipalities or other business corporations, structured and convertible bonds. The fund's general risk level and the measure of the deviation from the target weights are determined on the basis of a regular market analysis and situational analysis relating to four main aspects (fundamentals, valuation levels, market sentiment, technical factors). The core part of the fund consists of the foreign currency denominated, sovereign and quasi-sovereign bonds of Central and Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), Southeast Europe (Serbia, Turkey), Baltic states (Lithuania, Latvia) and the countries of the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and also holds Hungarian local currency bonds with diversification and liquidity management purposes. In case of attractive market conditions (e.g. possible upgrade of an issuer's long-term foreign currency debt rating, change of the yield curve, market mispricing, etc.) the fund may invest in bonds of issuers not listed above. The fund does not intend to invest more than 25% of its assets in a single country. The target weight for the fund's fixed income investments in the above listed countries (target countries) is 95%. The aimed risk profile of the fund is intermediate. We do not use constraints on foreign currency debt ratings. The fund may only conclude derivative transactions for the purpose of hedging or ensuring an efficient portfolio structure. The fund may also hold unleveraged debt-type collective investments linked to derivative indexes. The fund also has the option of taking on a substantial currency exposure, which will ordinarily be fully hedged to the target currency (USD), although depending on market circumstances the fund may even have an open currency position.

The investment policy of the fund changed on the 30th of December, 2016. Since then the fund has no benchmark, and fund performance before the change is not applicable.

## MARKET SUMMARY

The ECB provided new forward guidance on the monetary policy, stating that a key condition for lift-off is that inflation is seen to be reaching 2% "well ahead of the end of the projection horizon and durably for the rest of the projection horizon". The EU inflation reading for last month accelerated more than expected, to 3.0% YoY from 2.2%, driven by a well-built rebound in core inflation. ECB hawks are more vocal now, call for a reduction of PEPP purchases in Q4 '21 and termination of the program in the first quarter next year. 10Y Bund yields have risen further, consolidating above the -0.40% mark. Bond markets were calm for most of August before the surprise in Eurozone inflation triggered a sell-off in EGBs. Equity markets recorded modest gains, continuing their positive trend in the last few weeks, with the STOXX Europe 600 and the S&P 500 reaching new all-time highs ten times in August. Overall commodity market stayed range-bound. Exchange rates have remained mostly within tight trading ranges. Prospects of dovish Fed tapering ultimately lifted EUR-USD back above 1.18. We increased exposure to Azerbaijan, Ghana and Ukraine on improved fundamentals and attractive valuation while kept all other positions unchanged.

## GENERAL INFORMATION

Fund Manager:	AEGON Hungary Fund Manager Ltd.
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	AEGON Hungary Fund Manager Ltd.
Benchmark composition:	The fund has no benchmark
ISIN code:	HU0000718416
Start:	01/05/2017
Currency:	USD
Net Asset Value of the whole Fund:	23,492,085 EUR
Net Asset Value of USD series:	128,422 USD
