

INVESTMENT POLICY OF THE FUND

The aim of the investment fund is to give investors access to the Polish bond market and to function as a relatively stable, medium-risk investment already medium term, offering our customers stable real returns without the need to tie up their savings for a fixed period. The fund primarily invests into Zloty denominated Polish government bonds but the portfolio manager has some room to use other fixed income investments. We aim to maximise returns with the given risk level. Our investment decisions are based on fundamental research extended by technical research while we also take into account global market sentiment. Expected shifts in the yield curve based on our macro expectations are at the core of our investment process. Risk/return characteristics are also considered when we select suitable and safe investments. We aim to totally hedge any currency risk in the fund.

MARKET SUMMARY

The Polish bond market had a mixed performance in August. Polish bond yields also moved upwards on the back of an end-of-month sell-off in developed markets. Compared to the beginning of the month, yields were up 6 basis points on the three-year maturity and 16-17 basis points on the five- and ten-year maturities. Moving on to economic data, Polish GDP grew by 11.1% year-on-year in the second quarter, beating market expectations. Thus, expectations for this year were revised upwards from 4.8% to 5%. According to Bloomberg's August survey, third-quarter growth will be 4.9%, and quarterly GDP growth has been revised up to 6.5% from 6.2%. Inflation on a year-on-year basis in August was revised to rise further to 5.4% from 5% in the previous month, beating expectations. Prices in Poland have not risen at this rate for almost 20 years, so the likelihood of a possible rate hike this year is steadily increasing. The Purchasing Managers' Index fell to 56 points in August from 57.6 points in July, marking the second month of slowdown in manufacturing. Industrial production grew by 9.8% in July, slightly below market expectations. As for the general government, the state generated a surplus of PLN 7,262 million in the seventh month, reducing the 12-month rolling budget deficit to 1.37% of GDP.
