

INVESTMENT POLICY OF THE FUND

The aim of the fund is to function as a stable, low-risk investment vehicle, but to offer investors better returns than the performance of the current benchmark index. The fund is a standard variable net asset value money market fund.

The portfolio elements are selected in accordance with these and the Money Market Funds' principles.

The portfolio elements are selected in accordance with the above mentioned principles and based on the EU wide regulation on money market funds. To ensure liquidity the fund manager primarily aims to hold government bonds and discount treasury bills issued by the Polish Debt Management Agency, and short-term instruments (e.g. deposits, repos) available on the interbank market.

The fund is allowed to invest in securities issued or guaranteed by any EU member state, and in money market instruments issued or guaranteed by a supranational institution established in the EU in accordance with the Money Market Funds Regulation. The fund is only allowed to invest in debt securities, which are classified as investment grade on average by the external credit rating agencies.

In addition, some financial assets, which are particularly addressed by the EU wide money market regulation, shall have a favourable assessment based on the internal credit quality assessment procedure.

The fund may also hold investment units or shares within the framework of the Money Market Funds Regulation. The Fund invests at least 50% of its assets in PLN denominated assets (money market instruments issued or guaranteed by the Polish state; deposits; cash), also fulfilling the diversification requirements of the Money Market Funds Regulation.

The Fund shall have a weighted average maturity no more than 6 months, and a weighted average life no more than 12 months. Moreover, the Fund shall also be allowed to invest in money market instruments with a residual maturity until the legal redemption date of less than or equal to 2 years, provided that the time remaining until the next interest rate reset date is less than or equal to 397 days.

The fund may hold a limited proportion of foreign-currency instruments in its portfolio, but only subject to the full hedging of currency risk (the difference between the currency risk exposure of the derivative instrument and the hedged instrument can be maximum 5%).

Aegon Polish Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in Aegon Polish Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in Aegon Polish Moneymarket Fund is capable of fluctuation. Aegon Polish Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

MARKET SUMMARY

The Polish bond market had a mixed performance in August. Polish bond yields also moved upwards on the back of an end-of-month sell-off in developed markets. Compared to the beginning of the month, yields were up 6 basis points on the three-year maturity and 16-17 basis points on the five- and ten-year maturities. Moving on to economic data, Polish GDP grew by 11.1% year-on-year in the second quarter, beating market expectations. Thus, expectations for this year were revised upwards from 4.8% to 5%. According to Bloomberg's August survey, third-quarter growth will be 4.9%, and quarterly GDP growth has been revised up to 6.5% from 6.2%. Inflation on a year-on-year basis in August was revised to rise further to 5.4% from 5% in the previous month, beating expectations. Prices in Poland have not risen at this rate for almost 20 years, so the likelihood of a possible rate hike this year is steadily increasing. The Purchasing Managers' Index fell to 56 points in August from 57.6 points in July, marking the second month of slowdown in manufacturing. Industrial production grew by 9.8% in July, slightly below market expectations. As for the general government, the state generated a surplus of PLN 7,262 million in the seventh month, reducing the 12-month rolling budget deficit to 1.37% of GDP.
