

INVESTMENT POLICY OF THE FUND

The aim of the fund is to create for its investors an investment portfolio that generates a positive yield under all circumstances; in other words, it takes a 'total return' approach. It does this by using various analysis techniques to select the asset classes and investment funds that have the greatest potential to appreciate in value, and by investing in the shares of investment funds and in collective investment securities.

The fund primarily invests its capital in the funds managed by Aegon Hungary Investment Fund Management, but it may also purchase other investment funds and collective investment securities for its portfolio for the purpose of diversification, if the given asset class is not yet covered by the fund management company's own funds.

Indirectly, the fund is capable of accessing the entire known investment universe of today through the purchase of investment fund shares (in bond markets, money markets, equity markets, property market, private equity, derivatives and other regulated and OTC derivative products, commodity-market products, currencies etc.), and of making its investments both at domestic and international level.

To ensure liquidity, the fund may hold discount treasury bills and government bonds issued by the State Debt Management Centre (ÁKK), interest-bearing securities guaranteed by the State of Hungary, and bonds issued by the National Bank of Hungary.

In order to achieve a positive yield, the fund makes active use of risk management procedures and carefully selects the position size of its riskier investments.

Since the range of investments includes foreign currency-denominated investments, ETFs and investment fund shares, investors in the fund are also exposed to currency risk.

In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in order words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%, except AEGON Money Market Fund, AEGON Domestic Bond Fund, AEGON MoneyMaxx Express Fund, AEGON Alfa Derivative Fund, AEGON Central European Credit Fund and AEGON Ózon Capital Protected Fund.

MARKET SUMMARY

In August, markets continued their march to new highs and another record was broken. So far, the number of new highs set in August was 11, which occurred in 1929, followed by 10 in 1987. Both are notable, as these two years saw the two biggest market falls of the 20th century. We don't know if 2021 will be remembered for this, but it is safe to say that the current market overvaluation far exceeds that of 1929 and 1987. The economic structure now is completely different from what it was then. The growth of the economies was not so dependent on the performance of stock markets, which puts the current market conditions in a different perspective. Thanks to the continuous intervention of central banks, stock markets no longer reflect the real valuation of the real economies, but the liquidity provided by central banks. If this flow of money were suddenly stopped, there would be another crash regardless of the performance of the real economies. The US Federal Reserve wants to avoid this at all costs, and will do everything in its power to do so. The Jackson Hole meeting in August was held in this spirit, when Fed President Jay Powell implicitly suggested that the money supply would not be turned off. Although he hinted that not everything is going the way the Fed would like, he said that the time for financial tightening had not yet come. In Hungary the central bank has raised the interest rate by another 30 basis points to 150 basis points. The central bank's clear aim is to keep inflation in check without torpedoing economic growth. At the same time, they also want to stabilize the forint exchange rate, preferably around the EUR/HUF 350 exchange rate. With inflation on the rise around the world, it is possible that the central bank will be forced to raise interest rates further in order to keep Hungarian inflation inline. The fund posted a positive return in August after all but one of the fund's investments managed to increase their returns. The best return was achieved by Marathon, closely followed by Moneymaxx and Alfa, only the Panorama Fund had a slight negative return in August.
