

INVESTMENT POLICY OF THE FUND

The aim of the fund is to create for its investors an investment portfolio that generates a positive yield under all circumstances; in other words, it takes a 'total return' approach. It does this by using various analysis techniques to select the asset classes and investment funds that have the greatest potential to appreciate in value, and by investing in the shares of investment funds and in collective investment securities.

The fund primarily invests its capital in the funds managed by Aegon Hungary Investment Fund Management, but it may also purchase other investment funds and collective investment securities for its portfolio for the purpose of diversification, if the given asset class is not yet covered by the fund management company's own funds.

Indirectly, the fund is capable of accessing the entire known investment universe of today through the purchase of investment fund shares (in bond markets, money markets, equity markets, property market, private equity, derivatives and other regulated and OTC derivative products, commodity-market products, currencies etc.), and of making its investments both at domestic and international level.

To ensure liquidity, the fund may hold discount treasury bills and government bonds issued by the State Debt Management Centre (ÁKK), interest-bearing securities guaranteed by the State of Hungary, and bonds issued by the National Bank of Hungary.

In order to achieve a positive yield, the fund makes active use of risk management procedures and carefully selects the position size of its riskier investments.

Since the range of investments includes foreign currency-denominated investments, ETFs and investment fund shares, investors in the fund are also exposed to currency risk.

In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in order words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%, except AEGON Money Market Fund, AEGON Domestic Bond Fund, AEGON MoneyMaxx Express Fund, AEGON Alfa Derivative Fund, AEGON Central European Credit Fund and AEGON Ózon Capital Protected Fund.

MARKET SUMMARY

September had similar movements in the stock markets just like the previous months. Indices rose to new highs, but unlike in the previous period, stock markets got over valued I'll after the first week and ended the month in negative territory. The US legislature failed to agree on the budget for next year and the US is in danger of another government shutting down. This already has happened in the early 2010s, when a credit rating firm downgraded the US government's debt in response. In the middle of the month, the US Federal Reserve also met and gave the strongest signal yet that it would start reducing liquidity as early as this year, and aim to complete the process by next summer, which would mean a \$15 billion a month reduction in bond buying. Nine of the 13 voting FOMC members expect an interest rate hike as early as next year. That would put the Fed funds rate to 1% by the end of 2023 which would also be higher than expected. Investors have grown accustomed to the abundance of money provided by the central banks in recent years, and this withdrawal could cause serious problems. The central bank chairman is trying in vain to communicate that reducing liquidity is not the same as raising interest rates if the combined effect is the same for financial markets. In Europe, the ECB took a similar decision to the US at its September meeting, except that they are targeting yields rather than volume. The ECB's communication for years has been that they are targeting an inflation rate of 2%. In Hungary, the central bank raised the benchmark interest rate by a further 15 basis points in September to 165 basis points. The MNB's communication shows that QE has been reduced from 50 billion to 40 billion, bond purchases are mainly targeting the long side and forint swap liquidity is being reduced to achieve higher interest rates. The central bank's clear aim is to contain inflation without torpedoing economic growth. At the same time, they also want to stabilize the forint exchange rate, preferably in the EUR/USD 350-360 range. The fund went sideways in September after all but one of the fund's investments produced a slight negative return. Alfa, Maraton and Moneymaxx ended the month slightly in the red, but the good performance of Panorama compensated for the poor performance of these funds.

GENERAL INFORMATION

Fund Manager:	AEGON Hungary Fund Manager Ltd.
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	AEGON Hungary Fund Manager Ltd.
Benchmark composition:	The fund has no benchmark
ISIN code:	HU0000726450
Start:	02/16/2021
Currency:	HUF
