

INVESTMENT POLICY OF THE FUND

The aim of the fund is to create for its investors an investment portfolio that generates a positive yield under all circumstances; in other words, it takes a 'total return' approach. It does this by using various analysis techniques to select the asset classes and investment funds that have the greatest potential to appreciate in value, and by investing in the shares of investment funds and in collective investment securities.

The fund primarily invests its capital in the funds managed by Aegon Hungary Investment Fund Management, but it may also purchase other investment funds and collective investment securities for its portfolio for the purpose of diversification, if the given asset class is not yet covered by the fund management company's own funds.

Indirectly, the fund is capable of accessing the entire known investment universe of today through the purchase of investment fund shares (in bond markets, money markets, equity markets, property market, private equity, derivatives and other regulated and OTC derivative products, commodity-market products, currencies etc.), and of making its investments both at domestic and international level.

To ensure liquidity, the fund may hold discount treasury bills and government bonds issued by the State Debt Management Centre (ÁKK), interest-bearing securities guaranteed by the State of Hungary, and bonds issued by the National Bank of Hungary.

In order to achieve a positive yield, the fund makes active use of risk management procedures and carefully selects the position size of its riskier investments.

Since the range of investments includes foreign currency-denominated investments, ETFs and investment fund shares, investors in the fund are also exposed to currency risk.

In accordance with our obligation under law, we draw the attention of all investors to the fact that the fund is a fund that invests in other investment funds; in order words, in accordance with its investment policy it may invest more than 80 percent of its assets in investment fund shares or securities issued by other collective investment instruments. However, the fund's portfolio will not contain shares of any single investment fund in a weight of over 20%, except AEGON Money Market Fund, AEGON Domestic Bond Fund, AEGON MoneyMaxx Express Fund, AEGON Alfa Derivative Fund, AEGON Central European Credit Fund and AEGON Ózon Capital Protected Fund.

MARKET SUMMARY

At the beginning of December, it seemed that the Covid epidemic was no longer a concern, but unfortunately the Omicron variant started to spread very quickly. According to a recent study it was spreading four times as fast as Delta, and by the end of the month there was hardly a country without a case. So far, all we know is that it is more infectious than the earlier mutations, and we can only hope that it is not as deadly as the Delta variant was. Political leaders want to avoid widespread closures, but restrictions have been imposed in almost every country. Unless the death toll starts to rise sharply, we can be sure that widespread economic closures are nowhere to be expected, but problems could re-emerge in the supply chain which was just beginning to recover from the shock of the past year and a half.

The US Federal Reserve in its December meeting also made a decision that suggests that the cheap money policy may soon be over. The current liquidity program of 120 billion per month will be reduced by 30 billion per month over the next four months, and 2 or 3 interest rate hikes are planned for 2022.

The ECB is facing similar problems as the US Federal Reserve. Inflation is already significantly higher in Europe, but the central bank does not want to raise interest rates. Rising energy prices have been an impactful economic issue for the past month. This is having an impact on the performance of the economy, but the spike in inflation has been the biggest issue.

Hungary has been no exception to the rising inflation environment. Inflation in Hungary is also hitting record highs, in November it was at a 14-year high of 7.4%, and we are not expecting it to improve for 2022. The MNB has been trying to curb inflation with little success so far. It has continued to raise interest rates, with the 1-week depo rate at 4% and the base rate at 2.4%. Contrary to the central bank's expectations, the forint has not strengthened in response to the rate hikes, but sank to a new low against the euro at the end of the year.

The fund failed to increase its returns in December. Our absolute and total return funds' performance was mixed. While Panorama and Marathon managed to further increase their returns, Moneymaxx and Alfa ended the last month of the year with slightly negative returns.

GENERAL INFORMATION

Fund Manager:	AEGON Hungary Fund Manager Ltd.
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	AEGON Hungary Fund Manager Ltd.
Benchmark composition:	The fund has no benchmark
