

INVESTMENT POLICY OF THE FUND

The Fund is an absolute return investment fund that aims to create an investment portfolio through active portfolio management that achieves a return for its clients in excess of the benchmark, taking into account a predetermined risk profile. It intends to accomplish this goal primarily by investing on the bond market of the emerging European region. When implementing the Fund's investment strategy, the Fund Manager focuses primarily on emerging European hard-currency (dollar, euro) government and corporate bonds, leveraging its regional expertise. For diversification purposes, the Fund may also purchase other bonds (government securities, corporate bonds, mortgage bonds) typically issued in the region and denominated in local currency, and in addition, it may also conclude forward and other derivative transactions in order to establish an efficient portfolio. We aim to achieve a moderate risk profile when compiling the Fund's portfolio. The Fund makes its investments based on an extensive analysis of the issuer's creditworthiness, including a comprehensive assessment of the risks involved, especially with regard to non-investment grade issuers. The Fund may only conclude derivative transactions for hedging purposes, or in the interest of improving portfolio efficiency. The Fund may also hold units of non-leveraged collective investment schemes that track derivative indices. The Fund may also take on significant foreign currency exposure, which is normally fully covered by the Fund Manager, but depending on market conditions, the Fund may have an open foreign currency position. The Fund seeks to provide returns to its investors primarily through its bond investments.

MARKET SUMMARY

Undoubtedly the main theme in January was the continued hawkish pivot by a number of central banks in light of continued and persistent inflationary pressures, which led investors to price in a much more rapid hiking cycle over the months ahead. This was particularly the case from the Fed, where futures are now pricing in around two additional 25bp hikes in 2022 relative to the start of the month. That meant that multiple asset classes including equities, credit and sovereign bonds all lost ground, though oil was a notable exception amidst rising geopolitical tensions between Russia and the West over Ukraine. The latter pushed EM European credit spread to levels last seen in September 2020.

We entered the month with a lower duration risk and we switched to Ukrainian corporates to Ukrainian sovereigns after corporate papers outperformed their sovereign counterpart. We increased our Ukrainian exposure somewhat after the selloff and increased the duration profile of the fund somewhat.

GENERAL INFORMATION

Fund Manager:	AEGON Hungary Fund Manager Ltd.
Custodian:	Raiffeisen Bank Zrt.
Main distributor:	AEGON Hungary Fund Manager Ltd.
Benchmark composition:	Min. hozamkorlát, éves 0.4%
