

INVESTMENT POLICY OF THE FUND

The Fund is an absolute return investment fund that aims to create an investment portfolio through active portfolio management that achieves a return for its clients in excess of the benchmark, taking into account a predetermined risk profile. It intends to accomplish this goal primarily by investing in the bond and equity market of the emerging European region. The Fund's asset allocation is aligned with the given capital market conditions. It intends to accomplish this goal primarily by investing in the bond and equity market of the emerging European region. The Fund's asset allocation is aligned with the given capital market conditions. The Fund applies special investment strategies used by hedge funds to establish its strategy. The fund is willing to buy or sell all available investment instruments - domestic and foreign bonds (treasury bonds, discounted treasury bills, bonds issued by the National Bank of Hungary, as well as low-risk bank and corporate bonds expected to bring higher yields than the state securities) Equities and other securities, indices and currencies - provided it sees the opportunity to make substantial gains - up to the maximum limit allowed by the law, which allows double leverage for the Fund. To the extent set out in the investment strategy, the Fund may also invest in so-called non-investment grade securities, which represent additional risk compared to assets that are classed as investment-grade in terms of creditworthiness. In its investment decision-making mechanism, the Fund considers and weighs fundamental, pricing, technical and behavioural/psychological factors. To ensure liquidity the Fund aims to hold government securities issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary.

MARKET SUMMARY

At the beginning of February, investors were mostly concerned about how much and at what pace the US Federal Reserve would raise interest rates in 2022, but unfortunately this has been overshadowed by events in Ukraine. The odds of a rate hike have dropped significantly since the outbreak of the war, but even now we can be sure that the Fed will start the rate hike cycle. However, the armed conflict between Russia and Ukraine has completely changed the investment world. On February 24th, 2022, the Russian army launched a full-scale invasion of Ukraine. The emergence of an open war between Russia and Ukraine had previously seemed completely irrational to us, as no global superpower had launched a war of territorial aggression since World War II. Commodity prices have risen significantly in recent weeks, and not only the price of gold or oil, but also the price of wheat is close to all-time highs. So while the economy continues to slow down, inflation is at a 40-year high. Slowing economic activity in a rising inflationary environment is unfavorable for risk assets. Almost nothing other than commodity-linked sectors are performing well in a stagflationary environment, and this poses a serious challenge for economic agents. The Hungarian National Bank continued to raise interest rates in February in response to the high inflation numbers. The EURHUF exchange rate was stable until the outbreak of the Russian-Ukrainian war, but by the end of the month the forint had fallen to a new all-time low against the euro and the dollar. The fund posted a negative return in February. The fund had a total weight of 3.5% in Ukrainian government bonds and Russian corporate bonds before the outbreak of the armed conflict, and the devaluation of these bonds had a negative impact on the fund's value. During the month we sold all our Greek banks and Volkswagen exposure. we didn't have any Russian equities in the fund. By the end of the month, we had 20% exposure, of which 3 was in Hungarian equities and the rest in Chinese technology and European small cap stocks. At the end of the month we opened a position against the euro near the 370 level and bought gold when risk started to rise in the markets.

GENERAL INFORMATION

Fund Manager:	AEGON Hungary Fund Manager Ltd.
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	AEGON Hungary Fund Manager Ltd.
