

INVESTMENT POLICY OF THE FUND

The objective of the investment fund is to make the Polish bond market accessible to the investors, and to function as a relatively stable, medium-risk investment form bringing steady real yields to our Clients on middle term already, without having to tie down their money for a fixed period of time. The Fund mainly invests in Polish government securities issued in zloty, however, the portfolio manager has some room to complement the portfolio with other bond-type investments. Our goal is to achieve the highest yield while taking the lowest risk. To make investment decisions we use the tools of both fundamental and technical analysis, and we take into consideration the investor sentiment on the markets at all times. The portfolio manager seeks out potential investment opportunities based on the macro-economical expectations, the expected yield curve, the return expected on the curve and the market volatility, and selects investments that are considered to be safe and bring relatively high yields in exchange for the risks taken. The Fund strives for complete exchange risk coverage of foreign currency exposure for the target currency.

MARKET SUMMARY

The Polish bond market saw a massive rise in yields in March. The rate hike cycle continued at the beginning of the month, with the central bank raising interest rates by 75 basis points, against market expectations of 50 basis points, bringing the base rate from 2.75% to 3.5%. The yield curve flattened further during the month. Compared to the beginning of the month, yields were up 163 basis points on the 3-year, 147 basis points on the 5-year and 125 basis points on the 10-year. According to preliminary data, inflation in March rose to 10.9% year-on-year from 8.5% in February, which also finished well above market expectations. The higher figure may have been driven by soaring energy and commodity prices as a result of the Ukraine-Russia war. Poland's central bank also revised upwards its inflation forecast significantly, with inflation expected to reach 10.8% in 2022 and 9% in 2023, up from 5.8% and 3.7% respectively. Inflation in Poland has not been close to 11% for almost 22 years. As for economic growth, according to a March Bloomberg poll, first-quarter GDP growth was revised upwards from 6% to 6.4% and second-quarter growth was revised downwards from 4.6% to 3.8%. The Purchasing Managers' Index fell to 52.7 points in March from 54.7 points in February. Industrial production grew 17.6% in February, beating market expectations of 16.6%. As for public finances, the state generated a deficit of PLN 11 027.4 million in the first month, bringing the 12-month rolling budget deficit to 0.61% of GDP. Our fund outperformed its benchmark this month, as our Ukrainian bond exposure rebounded and we hold an UW in Polish bonds. Still, absolute return of the fund was significantly negative due to the quickly skyrocketing Polish government bond yields. At the very end of the month we closed our UW in Polish bonds, as we found valuation extreme.

GENERAL INFORMATION

Fund Manager:	AEGON Hungary Fund Manager Ltd.
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	AEGON Hungary Fund Manager Ltd.
