

INVESTMENT POLICY OF THE FUND

The Fund is an absolute return investment fund that aims to create an investment portfolio through active portfolio management that achieves a return for its clients in excess of the benchmark, taking into account a predetermined risk profile. It intends to accomplish this goal primarily by investing on the bond market of the emerging European region. When implementing the Fund's investment strategy, the Fund Manager focuses primarily on emerging European hard-currency (dollar, euro) government and corporate bonds, leveraging its regional expertise. For diversification purposes, the Fund may also purchase other bonds (government securities, corporate bonds, mortgage bonds) typically issued in the region and denominated in local currency, and in addition, it may also conclude forward and other derivative transactions in order to establish an efficient portfolio. We aim to achieve a moderate risk profile when compiling the Fund's portfolio. The Fund makes its investments based on an extensive analysis of the issuer's creditworthiness, including a comprehensive assessment of the risks involved, especially with regard to non-investment grade issuers. The Fund may only conclude derivative transactions for hedging purposes, or in the interest of improving portfolio efficiency. The Fund may also hold units of non-leveraged collective investment schemes that track derivative indices. The Fund may also take on significant foreign currency exposure, which is normally fully covered by the Fund Manager, but depending on market conditions, the Fund may have an open foreign currency position. The Fund seeks to provide returns to its investors primarily through its bond investments.

MARKET SUMMARY

Last month, the minutes of the FOMC's March meeting revealed that policy makers intend to shrink the central bank's balance sheet by \$95bn/month, while many FOMC participants said one or more 50bp rate hikes could be appropriate at future meetings; early May the Fed announced 50 basis point hike. The US and EU imposed additional sanctions on Russia. Russia stopped gas deliveries to Poland and Bulgaria over these countries' refusal to pay for gas in RUB in the end of April. China's Caixin services PMI for March slumped amid a new COVID-19 wave. Market activity was dominated by monetary-policy expectations. Rising geopolitical and growth concerns haven't supported USTs and EGBs as yields increased substantially during the month. Across European credit markets, hybrids and high-yield bonds underperformed investment-grade credit despite moderate new-bond supply. In FX, the US Dollar Index (DXY) remains around 103. EUR-USD steadied around 1.05 after briefly dipping below that level. The fund sold some Hungarian EUR corporate bonds issued by MOL as well as Kazakh sovereign papers. The fund still keeps its Ukrainian and the remaining part of the Russian corporate exposure and waits for improvement in the Ukrainian-Russia war.

GENERAL INFORMATION

Fund Manager:	AEGON Hungary Fund Manager Ltd.
Custodian:	Raiffeisen Bank Zrt.
Main distributor:	AEGON Hungary Fund Manager Ltd.
Benchmark composition:	Hurdle rate, annual 2%
ISIN code:	HU0000709597
Start:	01/12/2011
Currency:	HUF
Net Asset Value of the whole Fund:	16,641,289,843 HUF
Net Asset Value of A series:	2,151,969,376 HUF
