

INVESTMENT POLICY OF THE FUND

The objective of the fund is to offer to the investors calculable investment yields at low risk. The Fund Manager may exclusively invest its fund assets in bond-type assets, mainly securities issued or guaranteed by the Polish State. Furthermore, the Fund may to a limited extent invest in debt and equity securities issued or guaranteed by the European Union, or its organization, the European Central Bank or the European Investment Bank, provided that its credit rating is at least equal to that of the Polish state and is denominated in Polish zloty. Weighted average remaining duration of the assets in the portfolio of the Fund may not exceed 6 months, and the weighted average remaining life of the assets may not exceed 12 months. In addition, the remaining term of the individual securities can be no more than years, or 397 days until the next interest determination date. For the sake of liquidity, the Fund may keep its financial assets in form of bank deposit, as well. Assets of the Fund are 100% denominated in Polish zloty.

Aegon Polish Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in Aegon Polish Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in Aegon Polish Moneymarket Fund is capable of fluctuation. Aegon Polish Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

MARKET SUMMARY

April saw another massive rise in yields in the Polish bond market. The rate hike cycle continued at the beginning of the month, with the central bank raising interest rates by 100 basis points, against market expectations of 50 basis points, bringing the base rate from 3.5% to 4.5%. The yield curve inverted further during the month. Compared to the beginning of the month, yields were 119 basis points higher at the 3-year maturity, 125 basis points higher at the 5-year maturity and 116 basis points higher at the 10-year maturity. According to preliminary data inflation in April rose to 12.3% year-on-year from 11% in March, which also finished well above market expectations. Higher inflation was mainly driven by a larger-than-expected increase in food prices and a smaller-than-expected fall in fuel prices. Inflation could rise further in the coming months and peak in the summer months. Later, however, the inflation path may start to decline thanks to base effects related to last year's energy prices. A further upside risk to inflation is the fact that Russia stopped gas supplies to Poland at the end of April due to its refusal to pay in rubles. As for economic growth, according to an April Bloomberg poll, first-quarter GDP growth was revised upwards to 7.2% from 6.4% and second-quarter growth to 4.5% from 3.8%. The Purchasing Managers' Index declined to 52.4 points in April from 52.7 points in March. Industrial production rose 17.3% in March, beating market expectations of 11.8%. As for public finances, the state generated a deficit of PLN 11,534.3 million in March, bringing the 12-month rolling budget deficit to 0.83% of GDP.
