

## INVESTMENT POLICY OF THE FUND

The Fund aims to achieve capital growth by investing in bonds of emerging European countries and state-owned companies. The Fund does not apply credit rating restrictions: it may purchase securities of any country or company with any long-term credit rating. The Fund aims for the highest possible capital growth alongside reasonable risk-taking. The Fund primarily purchases foreign currency emerging market bonds, in addition to which it holds Hungarian local currency short-term and long-term bonds for diversification and liquidity management purposes. The bond portfolio may also include short-term, long-term, fixed or floating-rate, structured and convertible bonds issued by mortgage credit institutions, other credit institutions, local governments or other business entities. The core of the Fund's investments is Central Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), South East Europe (Serbia, Turkey), the Baltics (Latvia, Lithuania) and the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and bonds of majority state-owned companies, in addition to which the Fund holds short-term and long-term Hungarian government securities for diversification and liquidity management purposes. The target weight for bond exposures in the Fund in the 16 countries listed (target countries) is 95%. We do not set a limit on debt classification in the Fund. The Fund may only conclude derivative transactions for hedging purposes, or in the interest of establishing an efficient portfolio. The Fund may also hold non-leveraged bond-type collective investment forms. The Fund may also take on significant foreign currency exposure, which is normally covered 100% by the Fund Manager in the target currency (USD), but depending on market conditions, the Fund may also hold open foreign currency positions.

## MARKET SUMMARY

Jerome Powell said the Fed will need to see "clear and convincing" proof that inflation is decreasing, otherwise the central bank will have to move "more aggressively". US retail sales rose strongly, easing fears of a forthcoming slowdown. EC President Ursula Von der Leyen announced that about EUR 300BB would be made available to member states to end Russian energy imports by 2030, largely from unused RRF loans. Eurozone inflation leaped further to 8.1% YoY last month. The Brent (oil) price temporarily hit \$124/bbl after the relaxation of COVID-19-related restrictions in China and the EU's partial ban of oil imports from Russia along with the OPEC+ cartel announced an increase in its oil production. Record-high Eurozone inflation rates sent European GB yields climbing. The 10Y Bund yield increased by 16bp, the 10Y UST yield decreased by almost 9bp and hasn't been able to stay below 2.75% for more than a day, closed the month at 2.84%. Equity markets continued their stabilization efforts, while growth concerns and cautious company reports weighed on sentiment. Despite volatile yields in European credit markets, high yield outperformed investment grades, suggesting that investors are becoming less concerned about credit risk than they are about duration risk. In FX, EUR-USD regained 1.07 after a brief slide to 1.038. We completed withdrawal from the Russian credit, all other positions remained unchanged.

## GENERAL INFORMATION

Fund Manager:	AEGON Hungary Fund Manager Ltd.
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	AEGON Hungary Fund Manager Ltd.
Benchmark composition:	The fund has no benchmark
