Aegon Smart Money Fund of Funds

INVESTMENT POLICY OF THE FUND

The Fund's objective is to establish a portfolio for its Investors that generates positive returns – higher than the yields available on the domestic money market – under all circumstances, i.e. the Fund pursues a "total return" strategy. The Fund seeks to achieve this goal by selecting, through various analytical techniques, the asset classes and investment funds that have the greatest price growth potential and make investments through the purchase of investment units and collective investment securities. The Fund invests primarily in investment funds managed by Aegon Magyarország Befektetési Alapkezelő Zrt., but may also purchase other investment funds and collective investment securities in its portfolio for diversification purposes or if the given asset class is not yet covered by the Fund Manager's funds. In order to ensure liquidity, the Fund may hold in its portfolio discount treasury bills and government bonds issued by the Government Debt Management Agency (ÁKK), interest-bearing securities guaranteed by the Hungarian State, and bonds issued by the MNB. As the range of possible investments includes investments denominated in foreign currency, ETFs and investment units, the Fund's investors may also bear some foreign exchange risk. According to the Fund's investment policy, it invests or may invest more than 80 percent of its assets in investment units or other securities issued by a collective investment undertaking. However, the Fund does not intend to hold more than 20% weight in any one investment fund, except for the Aegon Money Market Fund, Aegon Domestic Bond Fund, Aegon Panoráma Derivative Fund and Aegon Ázon Maraton Active Mixed Fund, Aegon Panoráma Derivative Fund and Aegon ÓzonMaxx Absolute Return Fund, the weight of which may be as much as 100% within the Fund's portfolio.

MARKET SUMMARY

The Russian-Ukrainian conflict has been completely pushed into the background, and investors are almost exclusively interested in the impact of the war on inflation around the world. Food prices have already risen significantly as both Ukrainian and Russian grain exports have fallen sharply. Energy prices are also at a decade high, but here the price rise is mostly due to refined products. The US Federal Reserve is in a serious dilemma. In May, the biggest retail chains published their quarterly reports, and almost all reported weaker-than-expected results. This already suggests that the US economy is in a possible recession, even if the macroeconomic numbers do not yet show it. The Fed is still communicating that we can expect 50 basis point hikes and a large reduction in the bond portfolio in the coming period. The ECB is in similar situation to the Fed. The impact of the war in Europe is being felt in full force, and the inflationary impact is even higher. Natural gas prices have seen an unprecedented rise, but gasoline prices have also hit a record high. In Germany, annual inflation rose to 8.70%, a 60-year high. The Hungarian central bank continued to raise interest rates in May in response to the high inflation figures. In May, the MNB raised the base rate by 50 basis points to 5.90% and the one-week deposit rate to 6.75%. The EURHUF exchange rate was highly volatile in May due to the Russian-Ukrainian conflict. During the month, the forint weakened from 375 to 397 against the euro. At the moment, higher interest rates are unable to strengthen the Hungarian currency.

The fund achieved a positive return in May, after all of the fund's investments, without exception, achieved positive returns. Markets bottomed out in mid-May and were able to rise from there, and all the funds were positioned to this scenario.
