

INVESTMENT POLICY OF THE FUND

The aim of the Fund is to create an investment portfolio through asset allocation between and within asset classes that achieves annualised capital growth for investors higher than the benchmark over a 3-year time horizon. The Fund seeks investment opportunities primarily in emerging markets. In order to realise the investment objectives, the asset groups in the Fund's portfolio may be freely varied without having to adhere to any predetermined risk profile.

The Fund is a "total return" fund, which can invest in several asset classes, i.e. instead of focusing on just one sub-sector of the money or capital market, it concentrates its investments within a combination of assets that promises the highest possible return at any given time. The Fund does not aim to track a fixed benchmark, nor does it adhere to a fixed equity-to-bond portfolio ratio, but seeks to vary this ratio within broad boundaries, with the composition of the portfolio changing dynamically in order to achieve the Fund's return target. The Fund's investments focus on emerging markets. The Fund primarily allocates its assets between emerging-market local currency government securities, hard currency government and corporate bonds, and equity markets, in accordance with the latest market expectations. The Fund may thus assume interest rate risk, currency risk, credit risk, as well as equity market risk. The Fund may take positions in other regions and markets (e.g. commodity markets) besides the emerging markets. The Fund hedges most of its currency positions, but it may also take open currency positions. In the interest of efficient portfolio design, the Fund may also assume forward and futures positions.

MARKET SUMMARY

In July, the focus for investors remained on inflation and whether central banks can and will do anything about it. Although the US and European central banks have raised interest rates, these levels are still a long way from being able to make a meaningful impact on inflation. This situation is likely to persist for the rest of the year until investors are convinced that inflation has indeed peaked.

The US Federal Reserve raised interest rates again in July by 75 basis points, so the Fed fund's rate is now 2.50%, which is very low compared to inflation of 9%. Perhaps the biggest challenge facing the Fed is to maintain its creditworthiness. If the markets perceive that the Fed does not want to keep interest rates above a certain level, even though inflation is not yet under control, it may cause very serious structural problems.

Europe faces even bigger problems, which the Russian-Ukrainian war escalates even further. Inflation here is also very high, but the biggest problem is the energy supply. Russian gas is not coming in as much as in the past and this is having a negative impact on economic performance. If this continues into the winter period, some forecasts suggest that European economic performance could fall by 20-30%.

Hungary is no exception to the effects of inflation and the central bank is aggressively raising interest rates to curb consumption. The base rate is already 10.75% and another 100 basis point hike is priced in by the market for August. Unfortunately, Hungarian inflation is being impacted by a steadily weakening forint, but perhaps the region's highest interest rate environment will stop the Hungarian currency from weakening further.

The fund posted a negative return in July. On the bond side, we bought 3-year OTP Green bonds denominated in euro during the month. We are still holding the Qatari and Saudi Arabian bonds bought last month. On the equities side, the energy ETF exposure was stopped out when it fell below certain technical levels. On the commodities side, we cut the ETF exposure to 1.5% and closed the gold exposure. On the FX side, we continue to hold our forint positions against the Czech koruna, the Polish zloty and the euro. Thus, we remain 15% forint long in the fund.

GENERAL INFORMATION

Fund Manager:	AEGON Hungary Fund Manager Ltd.
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	AEGON Hungary Fund Manager Ltd.
Benchmark composition:	Hurdle rate, annual 3%
