

INVESTMENT POLICY OF THE FUND

The fund aims to profit from global megatrends that extend beyond economic cycles. Such trends may include demographic changes (ageing society, developing markets), efficiency gains due to scarce resources (renewable resources, energy efficiency), urbanisation, or even technological innovation. The fund aims to achieve its objectives through equity-type instruments, primarily exchange-traded funds (ETFs), equities and open-ended public investment funds. Megatrends are long-term changes that have a lasting impact on our social and economic environment. The fund aims to share in the profit growth of companies that could be winners in these processes. Megatrends are long-term processes that extend beyond normal economic cycles, are usually global and affect the whole world. Consequently, the fund does not have a geographical specification. As the fund aims to profit from long-term growth and has significant exposure to stock markets, it is recommended for risk-taking investors with a long-term investment horizon. The Fund holds its assets in euro. The Fund invests only in investments where the expense ratio remains below 2.5%, but always aims to keep the average fees charged on the underlying collective investment instruments below 1%. The fund also does not have a geographical specification, and thus no typical currency composition. The target currency of the Fund is therefore the settlement currency of the benchmark index (USD). Due to the strategy of the Fund, it may also invest in assets denominated in foreign currency. The Fund may hedge some or all of its foreign currency risk using forward currency positions against the target currency, i.e. the settlement currency of the benchmark (USD). The Fund Manager has a discretionary right to reduce the foreign currency risk of positions denominated in a currency other than the target currency, depending on market developments, by entering into hedge transactions. In addition, the use of equity and index futures is permitted in order to effectively build the Fund's portfolio.

MARKET SUMMARY

November had some positive macro data for investors in the US. Although the number of new job openings continued to rise, year-on-year inflation continued to fall, from 7.9% to 7.7%. This is very positive because the US Federal Reserve will not stop raising interest rates until the inflation rate starts to fall. The Fed's next meeting was held in early November and, as expected, they decided to raise the Fed Funds rate by 75 basis points, to 4%.

Europe continues to suffer from war-induced austerity. According to the November sentiment report of the German economic research institute IFO, which is typically one of the best indicators of the German growth rate, the index rose from 75.6 to 77, but remains depressed. Despite the weak economic data and high inflation figures, the minutes of the ECB's October rate decision meeting suggest that we can expect a 50 or 75 basis point hike from policymakers in December.

In Hungary, inflation remains very high. According to official data from the KSH, inflation was 22.5% in November. The increase, like the previous month's, is a multi-year record. The MNB did not change its base rate during the month and the forint was stable against the euro. It seems that Hungarian interest rates are now high enough to prevent the forint from weakening further. But of course, the most important factor for the forint in the short to medium term is whether or not Hungary will receive the EU funds.

The fund posted a negative return in November. Emerging market technology, renewable energy and the agricultural sector performed well during the month. In contrast, developed market technology and themes related to the ageing society, such as healthcare and insurance, underperformed. We increased the luxury consumer sector weight during the month. We believe that there will be a recession in the world in the near future and this sector is extremely well positioned for such. The upside benefit of the fund buying trends could be high in the coming period, so we will use the current favorable pricing levels, which are being formed by corrections, to buy. Overall, the fund is at 100% against the benchmark index.

GENERAL INFORMATION

Fund Manager:	AEGON Hungary Fund Manager Ltd.
Custodian:	Unicredit Bank Hungary Zrt.
