

## INVESTMENT POLICY OF THE FUND

The objective of the Fund is to create a highly defensive investment portfolio for its Investors, which typically invests in developed-market government bonds and related exchange-traded derivatives. According to the intentions of the Fund Manager, the bulk of the Fund's portfolio is made up of bonds issued by foreign states and foreign companies through public offerings. With regard to foreign securities, the Fund only purchases publicly traded securities listed on a foreign stock exchange. It keeps the planned share of non-investment grade securities low. The proportion of bonds that can be held in the Fund at any given time may reach the prevailing legal maximum. In order to ensure liquidity, the Fund may purchase Hungarian government securities (primarily discount treasury bills) and MNB bonds. The Fund Manager has the option, at its own discretion, of hedging all or part of its foreign exchange risks using forward currency positions subject to observing the applicable legal requirements.

## MARKET SUMMARY

Last month, both major central banks, the Fed and the ECB, raised their policy rates by 50 basis points, set off hawkish and indicated that further tightening is needed to ensure a timely return of inflation to target. On the data front, in the US, the CPI print for November pointed to cooling inflation, while retail sales fell. Eurozone PMIs signalled milder contraction amid easing price pressure. In China, industrial production and retail sales data showed meaningful deterioration. The boost to risk appetite from US CPI was progressively reabsorbed as hawkish central-bank comments were digested and global equities look set to finish the week in the red. The 10Y UST yield moved higher and almost reached the 3.90% area and EGB yields rose more sizably, with curves bear-flattening and periphery spreads widening. The 2Y Schatz yield climbed to its highest level since 2008, and the 10Y BTP-Bund spread widened to 215bp. In FX, EUR-USD tested 1.07 before falling back, while EUR-GBP rebounded to 0.87. We haven't made meaningful changes to the fund asset allocation, stayed at the neutral levels overall.
