

INVESTMENT POLICY OF THE FUND

The Fund aims to achieve capital growth by investing in bonds of emerging European countries and state-owned companies. The Fund does not apply credit rating restrictions: it may purchase securities of any country or company with any long-term credit rating. The Fund aims for the highest possible capital growth alongside reasonable risk-taking. The Fund primarily purchases foreign currency emerging market bonds, in addition to which it holds Hungarian local currency short-term and long-term bonds for diversification and liquidity management purposes. The bond portfolio may also include short-term, long-term, fixed or floating-rate, structured and convertible bonds issued by mortgage credit institutions, other credit institutions, local governments or other business entities. The core of the Fund's investments is Central Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), South East Europe (Serbia, Turkey), the Baltics (Latvia, Lithuania) and the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and bonds of majority state-owned companies, in addition to which the Fund holds short-term and long-term Hungarian government securities for diversification and liquidity management purposes. The target weight for bond exposures in the Fund in the 16 countries listed (target countries) is 95%. We do not set a limit on debt classification in the Fund. The Fund may only conclude derivative transactions for hedging purposes, or in the interest of establishing an efficient portfolio. The Fund may also hold non-leveraged bond-type collective investment forms. The Fund may also take on significant foreign currency exposure, which is normally covered 100% by the Fund Manager in the target currency (USD), but depending on market conditions, the Fund may also hold open foreign currency positions.

MARKET SUMMARY

Chinese GDP figures showed growth of 3.0% YoY in last year, the second slowest pace of growth since the 1970s, but also staling economic activity in the last quarter. ECB President Christine Lagarde confirmed the CB's hawkish stance and froze out news about slowing rate hikes to 25bp in March, after a 50bp hike in February. After hitting the debt ceiling last month, the US government started to take extraordinary measures to meet its debt obligations. Last week of January brought constructive news of growth in the Eurozone, with PMIs exiting contractionary territory and the German Ifo rising further amid improving expectations. The US Q4' 22 GDP expanded by a solid 2.9%, but this overstates the underlying strength in activity. The Fed slowed its tightening pace to a 25bp hike and flagged a couple more, but Chair Powell did not firmly push back against market expectations for rate cuts this year. The ECB hiked by 50bp and indicated another such move in March, with further tightening likely in the second quarter. Eurozone headline inflation fell more than expected in January, while the economy avoided contraction in Q4' 22. EGB and UST yields have moved a tad lower in the month. Stock markets have also been trading in narrow ranges, caught between positive economic indicators and cautious earnings reports. In FX, EUR-USD steadied below 1.09 after hitting a new YTD peak of 1.0929, while USD-JPY has mostly been trading around 130. Credit spreads have tightened slightly, with financials and non-financials seniors outperforming. We closed positions in Pemex and opened positions in the US and French treasury bills.

GENERAL INFORMATION

Fund Manager:	AEGON Hungary Fund Manager Ltd.
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	AEGON Hungary Fund Manager Ltd.
Benchmark composition:	The fund has no benchmark
